KRISTINA HALL

UI ENGINEER | [HTTP://KRISTINALHALL.NET](http://KRISTINALHALL.NET)

OBJECTIVE

Front End Developer, User Interface Engineer with a proven history of building feature-rich web applications that meet the needs of clients, working with developers and designers to ensure a clean and consistent implementation, and ensuring app stability through unit-test coverage.

SKILLS

Web standards: HTML, CSS, JavaScript, ES6+. UI frameworks: Ember.js, React, Vue.js, Bootstrap. Styles: Media Queries, LESS, Stylus, SASS. Data retrieval: Rest APIs, JSON, AJAX, Node.js. Unit tests, integration tests. ASP.NET, .NET MVC, Visual Studio (VSCode), PHP. Agile development practices, Confluence, Jira. Source code management: Git, Bitbucket.

EXPERIENCE

UI/UX DEVELOPER • TALIS CLINICAL, LLC • JUNE 2021 – PRESENT

Primary frontend developer at a medical software company building application to help doctors and nurses get alerts on changes in vitals and be able to chart changes in patients virtually. Primary responsibilities were all frontend styles of all applications using Vue.js and Bootstrap 5.0. Heavy usage of Sass to keep styles consistent and reusable with a critical eye on design and user experience.

WEBSITE DEVELOPER • NEW ELEVATION • JANUARY 2020 – DECEMBER 2020

Front end developer for a contracting company, contracted with a retail company running a Hybris website. Prime responsibilities were maintenance and creation of new React components to replace JSP pages.

UI ENGINEER • AMERICAN EAGLE OUTFITTERS • MARCH 2014 – DECEMBER 2019

Developed key parts of the UI for the customer-facing ecommerce site ae.com, primarily for the Checkout team. Created and maintained the core UI component library and style guide based on Bootstrap (2014-17) and handled migration to Ember components. Wrote unit, integration, and acceptance tests to ensure stability of the web application and its components. Reviewed pull requests and worked with developers to ensure their code was clean and understandable. Attended agile planning meetings and estimated LOE to ensure features were completed in a timely manner. Served as liaison between development and design to ensure accuracy in style implementation.

VISUAL DEVELOPER • BRUNNER • JANUARY 2011 – MARCH 2014

Front-end developer with multiple functions including building CMS-capable websites (Umbraco for .NET), custom interactive microsites, banner ads, and Facebook pages and contests.
